

Beta Testing Questionnaire – Eaton

Manufacturing System

1) Please score 1-10 as appropriate:

	Functionality	Layout	Features	Report Display	Record Manipulation	Efficiency - Program	Efficiency - Features	Comments
Menu	9	10	10	7		7	7	The reports of the components in the job could be improved by allowing more information about a product to be seen by opening it in a new window, also the 'lookup by' buttons are time consuming
Record Editor	9	10	10	10	9	7	10	Slow to open up and the input boxes could be improved
Import from Excel	10	10	10		10	10	10	Simple one button process – nice!
Labels	10	7	10	7		10	10	Works well but more information about the components in the job could be available
Trend Reports	10	7	7	9		10	10	Could offer extrapolated forecasting
Help	10	10	10	10		10	10	Concise and informative
File Cleaner	10	10	10	10	10	10	10	Does the job well
Password Manager	10	10	10	10	10	10	7	Could offer a strength of password or password randomiser option
Report Generator	10	10	10	10		5	10	Slow to populate after many

								options are selected but formatting is professional
Production Log	10	7	10	10		10	10	Could display more statistics

2) Did you find any problems while using the program?

I found many blank entries below my list of products on the menu, also had trouble importing from excel as I didn't know there was a required format.

3) Do you have any suggestions to further improve the usability of the program?

It would be quicker if you didn't have to press a button every time a selection was changed on the menu.

5) Was the program easy to use?

Yes. Flowed nicely and looks professional.

6) Please leave any comments below.

I would like to have access to an end of day feature so I can see all the produced items of that day.
